General Information

Americans with Disabilities Act

The **Americans with Disabilities Act** (ADA) prohibits discrimination on the basis of disability in employment, State and local government, public accommodations, commercial facilities, transportation, and telecommunications. It also applies to the United States Congress.

The ADA defines a person with a disability as someone who has a documented physical or mental impairment that substantially limits one or more of their major life activities, such as walking, hearing, or maintaining sustained concentration; a person who has a history or record of such an impairment; or a person who is perceived by others as having such an impairment. The ADA does not specifically name all of the impairments that are covered because there is no exhaustive list. Disabilities can be permanent, such as a first-year student who has been blind since birth, or temporary, as in the case of a sophomore undergoing cancer treatment whose chemotherapy is causing debilitating but short-term side effects. Under the ADA, a college must provide "reasonable accommodation" to students with disabilities so that they have the same access to education and the same opportunities for lifelong inquiry, transformative learning, and meaningful service as the rest of the student body.

The Americans with Disabilities Act Amendments Act (ADAAA) of 2008

The changes in the definition of disability in the ADAAA apply to all titles of the ADA, including title I (employment practices of private employers with 15 or more employees, state and local governments, employment agencies, labor unions, agents of the employer and joint management labor committees); title II (programs and activities of state and local government entities); and title III (private entities that are considered places of public accommodation).

Under the laws, learning, reading, thinking and concentrating are all considered major life activities among others listed in the law. If a student is eligible for services under Individuals with Disabilities Education Act of 2004 (IDEA), he/she qualifies for protection under the ADAAA.

Section 504 (of the Rehabilitations Act of 1973)

The focus of Section 504 is on non-discrimination. For that to happen, a student must receive services that level the playing field in order to learn and be evaluated.

Section 504 states that "no qualified individual with a disability in the United States shall be excluded from, denied the benefits of, or be subjected to discrimination from" any program or activity that either receives Federal financial assistance or is conducted by any Executive agency or the United States Postal Service. The Rehabilitation Act prohibits discrimination on the basis of disability in programs conducted by Federal agencies, in programs receiving Federal financial

assistance, in Federal employment, and in the employment practices of Federal contractors. The standards for determining employment discrimination under the Rehabilitation Act are the same as those used in Title I of the Americans with Disabilities Act.

Each Federal agency has its own set of section 504 regulations that apply to its own programs. Agencies that provide Federal financial assistance also have section 504 regulations covering entities that receive Federal aid. Requirements common to these regulations include reasonable accommodation for employees (and students) with disabilities; program accessibility; effective communication with people who have hearing or vision disabilities; and accessible new construction and alterations.

Section 508

Section 508 establishes requirements for electronic and information technology developed, maintained, procured, or used by the Federal government. Section 508 requires Federal electronic and information technology to be accessible to people with disabilities, including employees and members of the public.

An accessible information technology system is one that can be operated in a variety of ways and does not rely on a single sense or ability of the user. Some individuals with disabilities may need accessibility-related software or peripheral devices in order to use systems that comply with Section 508.

What are “Reasonable Accommodations”?

ADAAA mandates that reasonable accommodations must be provided to students with disabilities to help him or her learn most effectively.

The Americans with Disabilities Act (1990) stipulates that postsecondary institutions are responsible for providing necessary accommodations when a student discloses a disability, unless to do so would "fundamentally alter" the nature of the programs or result in an "undue burden." Providing accommodations do not compromise the essential elements of a course or curriculum; nor do they weaken the academic standards or integrity of a course.

Accommodations simply provide an alternative way to accomplish the course requirements by eliminating or reducing disability-related barriers. In the context of higher education, it is easier to define what is not reasonable and assume that if the accommodation needed does not clearly fall under those guidelines, it is probably reasonable. There are three kinds of accommodations that are not considered reasonable: (1) It is not a reasonable accommodation if making the accommodation or allowing participation poses a direct threat to the health or safety of others;

(2) It is not a reasonable accommodation if making the accommodation means making a substantial change in an essential element of the curriculum (educational viewpoint) or a

substantial alteration in the manner in which you provide your services; and (3) It is not a reasonable accommodation if it poses an undue financial or administrative burden.

Colleges are not required to provide the most sophisticated accommodations available; however, the accommodations provided must effectively meet the needs of a student with a disability.

Temporary vs Permanent Accommodations

The Access and Accommodations office recognizes that individuals with temporarily disabling conditions that are a result of injuries, surgery, or short-term medical conditions may need access to services and resources similar to individuals with permanent disabilities. Examples of temporary disabilities may include, but are not limited to, broken limbs, hand injuries, or short-term impairments following surgery or medical treatments.

The Labouré Access and Accommodations Office recognizes that temporary medical conditions that occur during the school year may adversely affect a student's ability to fully participate in class and student life.

Conditions that are episodic or in remission are covered by ADA when they are active.

Appropriate documentation is necessary for both temporary and permanent accommodations. Please consult this office when seeking an accommodation for a temporary or permanent injury and/or disability.

Students who are conditionally accepted, may provide other college or IEP documentation to receive temporary accommodations for testing purposes, however, will need to proceed through the formal process if they are accepted as a student.

Classroom vs Testing Reasonable Accommodations

All medical documentation will be assessed by the Coordinator for Access and Accommodations or the Assistant Vice President of Student Affairs. Learning accommodations are administered to create equal academic opportunity. A determination of whether accommodations are appropriate and relevant for each student will be deemed on individual basis per the record of medical and/or clinical documentation from a licensed provider.

Classroom accommodations if applicable: record lectures, note taker, calculator, audio books, PowerPoint/outline given before class

Testing accommodations if applicable: separate room, *extended time, calculator, scribe, reader

Assistive technology if applicable: devices and/or programs that aide a student in learning and managing content, time management (i.e.: Echo Livescribe Smart Pen, speech-to-text software, audio books, etc.)

*Extended time typically applies to tests, exams and quizzes, but could also apply to other class assessments (i.e.: papers, projects, etc.) depending on the student's needs. Extended time on one type of assessment does not automatically mean that the student receives extended time on all assessments in the class. Further determination of extended time will be assessed by the Coordinator or Assistant Vice President of Student Affairs during a student's Individualized Accommodation Plan Approval meeting.

Students will receive a confirmation email on the last day of the first week of each semester (end of Add/Drop Period) explaining that they have continued accommodations. This email will outline what may have changed from the previous semester and remind students on how they will receive notification on when/where their examination will take place.

The policies and procedures associated with reasonable accommodations are to be discussed with the coordinator and/or Assistant Vice President of Student Affairs.

Appeal Process:

The question of whether a reasonable accommodation is necessary for an institution of higher education (i.e., should be provided) may not hinge on whether the person has a disability, but rather on whether or not the accommodation needed is reasonable. Saying "no" to a request that is not considered reasonable should not be viewed as the end of a discussion of accommodation options. If the student feels that their request should be reconsidered, the student must make an appointment with the Assistant Vice President of Student Affairs to discuss the nature of the disability and accommodations being requested and that will be the final decision.

The AVPSA who also serves as the certified Title IX Coordinator is also trained under atIXa to support the ADA/504 Coordinator or act in their place as needed.

Student Responsibilities and Information

Self-Identification

In order to be eligible for appropriate accommodations, students must identify themselves to Labouré College of Healthcare and provide documentation of a disability. A student may register with a disability on a voluntary, confidential basis at any time. However, the college is not responsible for providing any accommodations for students who have not registered with a disability and requested a specific accommodation. Students are advised to initiate the accommodation process by reaching out via e-mail to Access@laboure.edu or the Student

Success Center. The SSC can help determine whether the student is eligible for services and, if so, coordinates appropriate accommodations and services based on the documentation provided and in consultation with the student and other professionals, as appropriate. It is the responsibility of students who seek disability-related accommodations and services to provide written documentation of their disabilities, as discussed below.

Self-advocacy

Self-advocacy is an important part of the process to ensure that students are receiving the help and accommodations that students require to be a successful student here at Labouré College of Healthcare. Self-advocacy refers to “an individual’s ability to effectively communicate, convey, negotiate or assert their own interests, desires, needs, and rights. It involves making informed decisions and taking responsibility for those decisions.” (VanReusen et al., 1994)

Important tips for Self-advocacy are:

- To learn about your learning needs, strengths, and weaknesses
- To know which accommodations you need, as well as why you need them and how they help you
- To know how to effectively communicate your needs and preferences to your professors and Access and Accommodations office.
- To be willing to ask questions when something is unclear, or you need clarification

You are your best advocate through this process. This office and your professors are here to help you be successful, however, it is your responsibility to keep your professors and the Access and Accommodations office informed of your needs throughout your time as a student at Labouré College of Healthcare.

Steps to Apply for Accommodations (The Access and Accommodations office requires a minimum of two (2) weeks after receiving documentation before accommodations can be approved/implemented.)

1. Complete the *Student Disclosure Form* (Appendix C) and return it to the Student Success Center or via email to Access@laboure.edu.
2. Complete the *Release of Information Form* (Appendix A) and give that, along with the *Disability Disclosure Form* (Appendix B) to your provider (doctor, therapist, etc.) and return it to the Student Success Center or via email to Access@laboure.edu.
3. Set up an Individualized Accommodation Plan approval meeting with the Access and Accommodations Coordinator or Assistant Vice President of Student Affairs to discuss your learning history and determination of accommodations. You can schedule this appointment with the Student Success Center by calling (617) 322-3579.
4. Complete appeals process if you disagree with the outcome (see “Appeals” in the General Information section).

Deadlines per Semester

Steps 1, and 2 should be completed for full accommodation provided the Access & Accommodation office has received all documents at least 1 week before the semester begins. This allows for a meeting to be set up between the Coordinator or AVPSA and the requesting student. It also allows for the faculty overseeing the exam software to have enough time to add them into the exam software. Documentation submitted after the start of the semester will be reviewed typically within 3-5 business days of receiving a complete packet, but accommodation decision-making, implementation, and approval, may not be guaranteed for the remainder of the semester and **may** take an additional 5-7 business days depending on the Coordinator/AVPSA/Student availability. The faculty overseeing the exam software also need at least 2-3 business days to enter their information once the confirmation of approved accommodations has been determined.

Deadlines are associated with the college's Academic Calendar. Students enrolling in Labouré College of Healthcare should contact the Access and Accommodations Office within 30 days prior the start of their first course. Missing the deadline does not make you ineligible for receiving accommodations, but there may be a delay in setting up your accommodation meeting and approval.

Appropriate Documentation

Disability documentation should be current and relevant but not necessarily "recent." (Recent is within the last 10 years). Disabilities are typically stable lifelong conditions. Therefore, historic information, supplemented by interview or self-report, is often sufficient to describe how the condition impacts the student at the current time and in the current circumstances. Determining accommodations in distinctly new contexts may require more focused information to illustrate a connection between the impact of the disability, the described barrier, and the requested accommodation.

All disability/accommodation documentation must follow the following standards:

- Must be from an approved provider (i.e.: psychologist/therapist for mental health concerns; NP/MD/neuropsychologist for AD(H)D; IEP/504 Plan for educational concerns; MD for medical concerns; etc.)
- State a diagnosable disability (must include an ICD-10 or DSM-IV-TR or DSM-5 code)
- State how the disability effects learning (at school and/or at clinical)
- Recommend specific accommodations

Student Accountability and Confidentiality

All disability-related information including Individualized Accommodation Plans, in-class, and out of class learning accommodations, are to be considered confidential. All information regarding learning accommodations should be arranged with the Labouré Access and Accommodations office and once approved, the individual student may share their specific learning

accommodations with their instructor without detailed explanation of their disability. Students receiving learning accommodations are not to discuss their Individualized Accommodation Plan with their student peers and all disability services inquiries are to be deferred to the Coordinator of Access and Accommodations or Assistant Vice President of Student Affairs.

Students receiving the testing accommodation of extended time in a separate room are to be considerate of the scheduled testing time. Students are required to arrive 15 minutes prior the start of the test. If tardy *two* or more times, the student receiving the testing accommodation of extended time in a separate room is to meet with the Coordinator of Access and Accommodations or Assistant Vice President of Student Affairs for a reevaluation of their approved accommodation. If the student fails to show for this review, all scheduled testing invitations through the Labouré Access and Accommodations Office will terminate. Student punctuality is mandatory.

Students receiving testing accommodations through the Access and Accommodations office will adhere to the academic policies noted in the Code of Conduct and Academic Integrity policies. Students enrolled in professional nursing courses are also mandated to follow the same exam policy procedures found in the Nursing Student Handbook.

Other Supportive Interventions

Assistive Technology: While this is not a specific classroom or testing accommodation, the student can arrange a meeting with the Coordinator of Access and Accommodations or Assistant Vice President of Student Affairs to discuss technologies that will assist in the student's learning.

Academic Advising: Academic Advising is a working partnership that focuses on the process of learning and academic success. The student will work with an academic advisor to examine their specific learning style, habits of working, and current difficulties or barriers to academic success. The student and academic advisor then work together to learn and implement new, more beneficial, learning strategies for academic achievement.

Tutoring: Professional academic tutors are available throughout the semester for a variety of content areas and courses. Please see the current schedule posted in the library, the Student Success Center, and electronically on the student portal for details. Students may contact the Student Success Center with specific questions. For professional tutoring services, please contact your program's Chair or Dean.

After You Receive Accommodations

- Access and Accommodations will notify your course professors or instructors
- Access and Accommodations will notify you at least 48 hours prior to your assessment/exam with the details of time, location, and the name of the proctor

Course Professor Information

It is important for a course professor or instructor to be in communication with students receiving accommodations in their class. The best resource Labouré College of Healthcare can provide a student with learning differences is open communication about their learning needs.

General Information

The course professor or instructor must email Access@laboure.edu prior to or at the beginning of each semester with all assessment dates and times throughout the semester. In addition, the course professor or instructor must update the Coordinator or Assistant Vice President of Student Affairs throughout the semester with any date/time changes. This should be done at least 1 week in advance to ensure a proctor can be scheduled.

How to Implement Accommodations

Classroom Accommodations:

Record Lectures: The student will provide a letter from the Coordinator of Labouré Access and Accommodations and the Assistant Vice President of Student Affairs stating that he/she has the accommodation of recording class lectures. The course professor or instructor must comply with this letter. The course professor/instructor, student, the Coordinator of Access and Accommodations, and the Assistant Vice President of Student Affairs will sign an agreement each semester. Students who are found to be not following this agreement are at risk of losing this accommodation for their current or future semester(s).

Note Taker: If there are students in the class with this approved accommodation as requested by a physician, the course professor or instructor will read the following statement to the class upon notification by the Coordinator of Access and Accommodations or Assistant Vice President of Student Affairs:

“Labouré Access and Accommodations is currently seeking a note taker in this class to provide supplemental notes to a student with learning accommodations. If you are interested in being a note taker for this class, please contact me at the end of this class.”

The course professor or instructor will then provide the Coordinator of Access and Accommodations with the names of interested students who will coordinate this request.

PowerPoint/Outlines: The course professor or instructor will either upload to eLearning or email the student an outline of the lecture notes or the PowerPoint of the lecture prior to the class lecture to help the student with in-class focus and note-taking.

Testing Accommodations:

Extended Time: If the student does not require a separate room professors or instructors are to make arrangements with the student for extended time. Students have a right to take assessments in their regular classroom with their peers. This is typically done by the professor or instructor beginning the test/quiz before the start of the regular class time or staying later to

account for the extra time. Because these students do not require additional spaces, this accommodation is managed by the course professor or instructor with the assistance of the Coordinator of Access and Accommodations, Assistant Vice President of Student Affairs, and the Division Chair or Dean.

For students approved to be tested in a separate space: This accommodation may apply to class quizzes, tests, exams, labs, or other class assessments, depending on the student's needs and appropriateness of the assessment.

Separate Room: The Access and Accommodations office coordinates all scheduling of rooms. The course professor or instructor must provide Access and Accommodations with the standard amount of time given to the class for the assessment. Access and Accommodations will email the student, course professor or instructor, and proctor at least 48 hours prior to the assessment with the details of time, location, and the name of the proctor.

Paper and computerized exams are to begin punctually at the time scheduled by Access and Accommodations in conjunction with the course faculty.

Paper exams: The course professor or instructor must provide Access and Accommodations with paper copies of the assessments at least 24 hours prior to the assessment. The course professor or instructor must append any instructional information and supplemental scantron(s) (if applicable) to the paper copies of the exam. Any instructional information will be communicated to the students by the Proctor at the start of the exam. The Access and Accommodations office will organize returning the completed assessments to the course professor or instructor. Exams where licensure is completed on a computer cannot be offered in a paper format as it no longer becomes a reasonable accommodation.

Computerized exams: The course professor or instructor must be present at the start of the scheduled exam to provide students with any instructional information and log-in and test credentials. Testing proctors will not be held accountable to relay testing log-in credentials. Access and Accommodations will provide the course professor/instructor(s) with the time and location of the computerized exams. Students are to receive all necessary information 5-10 minutes prior the start of the exam to be able to utilize full-extended time if needed. Testing accommodations with extended time will allow students to begin computerized exams earlier than in-class delegation. Course professor/instructor(s) are to be physically present on the Labouré Campus during the entirety of the testing administration.

Student retakes or exam schedule complications: All course professors or instructors are able to administer a retake or exam reschedule (without use of external proctor) if available and willing to comply with the students individualized Accommodation Plan. If this is unable to be organized, the course professor or instructor is to refer the student to Access and Accommodations directly for an exam reschedule. The student will then complete a Labouré Access and Accommodations Testing Retake Request Form. This document will be approved by the Access and Accommodations office and the course professor or instructor no more than 24

hours after the original testing date. All Labouré Access and Accommodations Testing Retake Request Forms will be assessed and approved on an individualized, case-by-case basis.

Faculty to Proctor Communication During Examinations: To ensure privacy and compliance of ADA/504, faculty members are to communicate with proctors via calendar invitation sent by Access@laboure.edu only. The Coordinator of Access and Accommodations or Assistant Vice President of Student Affairs will include all necessary recipients on this email. Instructors are to click “Contact Attendees” and “Reply to All” on this calendar invitation to notify the proctor at any time during the exam. Personal cell phone communication is not authorized or confidential. *This method of communication includes, but is not limited to, clarification of non-medical terminology during an exam.*

Academic Dishonesty

If a course professor or instructor suspects academic dishonesty by a student who is receiving accommodations, the professor/instructor is to handle the incident as he/she would with any student in the class. Please refer to the Academic Integrity Policies and Procedures from the Student Rights and Responsibilities Handbook as well as the Nursing Division Handbook.

Proctor Information

General Information

- Proctors will be assigned testing groups based on availability.
- They will be informed as early as possible as to what time to arrive, the number of students to expect, the course/section, location of exam, and type of exam being proctored.
- Proctors will work with faculty to administer the exam as passwords may not be available until just before the exam begins.

Proctor responsibilities during a Paper Exam

- Arrive to the testing room at least 30 minutes prior to the start of the assessment
- Ensure that all student belongings (bags, cell phones, electronics, etc.) are placed along the wall at the front of the room
- Walk/Observe around the room throughout the assessment time to ensure that students are not cheating

Proctor responsibilities during a Computer Exam

- Arrive to the testing room at least 30 minutes prior to the start of the assessment

- Ensure that all student belongings (bags, cell phones, electronics, etc.) are placed along the wall at the front of the room
- Walk around or observe the room throughout the assessment time to ensure that students are only on the website of the exam and no other internet website.
- Proctors are also to ensure there is quiet testing areas in the surrounding hallways and rooms. They may need to communicate with faculty or students to ensure there is a respectful testing area.

Proctor to Faculty Communication During Examinations: To ensure privacy and compliance of ADA/504, proctors are to communicate with course Instructors via calendar invitation sent by Access@laboure.edu only. Access and Accommodations will include all necessary recipients on this email. Proctors are to click “Contact Attendees” and “Reply to All” on this calendar invitation to notify the course Instructor at any time during the exam. Personal cell phone communication is not authorized or confidential. *This method of communication includes, but is not limited to, clarification of non-medical terminology during an exam.*

Academic Dishonesty

If a proctor suspects a student of academic dishonesty, the proctor must immediately stop the student from test taking and collect the assessment. The proctor must then immediately notify Access and Accommodations Coordinator or other identified administrator of the situation. The administrator will go to the testing room to assess the situation and make a determination. The administrator will also notify the course professor or instructor of the situation.

Release of Information

Dear (Clinician Name): _____:

I am requesting services from the Labouré Access & Accommodations Office. In order to receive services, the Office requires documentation of my disability. Services are solely based on diagnostic documentation. Once this information is in place, it will be used to provide accommodations to me.

I hereby authorize you to complete the enclosed Disclosure Form and release it to the Office.

I also authorize you to speak with the Coordinator of Labouré Access and Accommodations in consultation to provide future services.

Please submit the completed form to:

Office of Labouré Access and Accommodations
Labouré College of Healthcare
303 Adams Street
Milton, MA 02186
Fax: 617-690-3730

You may contact this office with any questions (phone: 617-322-3579) or email: Access@laboure.edu.

Thank you for your timely assistance with this matter.

Sincerely,

Student Signature: _____

Date: _____

Print Name: _____

Disability Disclosure Form

This form must be completed by the licensed clinician or provider **who is treating or assessed this student for the diagnosis identified in this document.** *In order to best serve the student, please thoroughly complete all requested information.*

Student's Name: _____

Clinician's Name: _____

Area of Specialty: _____ Phone #: _____

The person named on this form is requesting services from Labouré Access & Accommodations. The Office offers services to students who are considered disabled under the mandates of the Americans with Disabilities Amendments Act of 2008 (ADAAA).

By completing this document, I verify that the person named in this document has a substantially limiting disorder that meets the ADAAA disability criteria noted below. (A letter on Provider's letterhead with the requested information may be substituted for this form.)

Under the ADAAA definition, a person with a disability is one with a physical, mental, emotional or chronic health impairment that substantially *limits one or more major life activity* such as caring for oneself, performing manual tasks, seeing, hearing, eating, sleeping, walking, standing, lifting, bending, speaking, breathing, learning, reading, concentrating, thinking, communicating, and working. Major life activities also include bodily functions relating to the immune system, normal cell growth, digestive, bowel, bladder, neurological, brain, respiratory, circulatory, endocrine, and reproduction (*this is not an exhaustive list*).

Please thoroughly complete this form to document the substantial limitations that are linked to this disability. Please attach all relevant documentation including pertinent testing and diagnostic assessments.

1. Diagnosis/Description of Disability: _____
2. Please provide full DSM or ICD-9 code: _____
3. Initial Date of Diagnosis: _____
4. Date of Last Clinical Contact: _____
5. The extent of the disability is: Mild Moderate Severe
6. Expected duration of medical condition or disability: Long term Short-term Temporary
7. What is the frequency and duration of symptoms of the student's condition?
 Daily 1-3/week 1/week 1/month 1-3/year Seasonal
