

**New Course Added: Nursing Remediation**

The following course has been added to the College catalog, effective in Spring 2023.

**DSN 0100**

*1 credit*

This is a one-credit pass-fail course designed for students who have not attained clinical eligibility (i.e., earned a F in the clinical portion of the course) or not achieved a passing grade in NUR 1015. The course focuses on test-taking, critical thinking, and applied math skills. Students develop and apply these skills in answering nursing examination questions and in developing a plan of action for resuming nursing studies. It is offered after a nursing student fails NUR1015.
